Dear Black Hawk Energy Products, LLC:

I am writing this letter to share with you the pleasure I have in what we did at this facility. Eleven months ago we had the Black Hawk Powerhouse installed. I did have some reservations before the installation because this is a surgery center where electricity and the equipment are extremely important to providing optimal care for our patients, but also on the benefits proposed. It sounded almost too good to be true, but now after eleven months I can say without a doubt the product does exactly what your company states.

We have decreased our electric expense by \$1300 a month (16% savings) and this alone would prove the value of the product, but it does more than that. Immediately after installation I felt the center had better lighting. I normally call maintenance to change out the fluorescent lighting or do it myself and the need to do this has been dramatically reduced. We also have seen a huge difference with maintenance/repair savings. Since having the Powerhouse in place we have decreased our maintenance/repair expenses by over \$8K. It truly is amazing.

I recommend this to any business. There's not many products out there that can immediately start saving you money, increase the life of your electric equipment, and decrease your maintenance expenses, but this product does just that. I couldn't be happier with our results and I know with the help of this device we're providing a better place for the patients in our community.

I appreciate all the help.

Sincerely,

A handwritten signature in black ink that reads "Lamar McEntire". The signature is written in a cursive style with a large, sweeping flourish at the end.
